SUMMARY

B.Tech Computer Science Engineering graduate (IPS Academy, Indore — 2026), currently working as an AI/ML Trainee Intern at Technorizen Software Solutions, gaining hands-on experience in machine learning workflows. Skilled in Python for data analysis (Pandas, NumPy, Matplotlib) and backend development (Flask, REST APIs, SQLite). Actively building supervised-learning and time-series projects, including customer churn prediction, house price prediction, and stock price forecasting. Strong problem-solving foundation backed by daily DSA practice. Certified Oracle AI Foundations Associate. Passionate about applying machine learning to real-world data problems and eager to grow in a research-driven environment.

TECHNICAL SKILLS

- **Python & ML Libraries:** Python, Pandas, NumPy, Matplotlib, Scikit-learn (familiar)
- **Machine Learning:** Supervised Learning (Classification & Regression), Time Series Analysis & Forecasting, Feature Engineering, Model Evaluation
- **Backend / APIs:** Flask, REST API design & testing, SQLite
- **Databases:** SQLite, basic SQL — schema design, queries
- **Other Programming:** Java (OOP fundamentals), JavaScript
- **Problem-Solving:** Active daily DSA practice (arrays, strings, recursion, sorting/searching, basic trees & graphs)
- **Tools:** Git, GitHub, basic OS/Linux concepts

PROJECTS

- | | |
|---|------------------|
| Customer Churn Prediction <i>Python, Pandas, Scikit-learn</i> | In Progress |
| • Building a machine learning model to predict customer churn from behavioral and usage data, applying data cleaning, feature engineering, and classification algorithms to flag at-risk customers. | |
| House Price Prediction <i>Python, Pandas, Scikit-learn</i> | In Progress |
| • Building a regression model to predict house prices from property features, applying exploratory data analysis, feature engineering, and regression algorithms for accurate price estimation. | |
| Stock Price Prediction (Time Series Analysis) <i>Python, Pandas, Time Series Forecasting</i> | In Progress |
| • Building a time-series forecasting model to predict stock price trends from historical data, applying trend/seasonality analysis and forecasting techniques. | |
| Sales Data Analysis <i>Python — Pandas, NumPy, Matplotlib</i> | Personal Project |
| • Analyzed sales datasets, cleaned the data, identified trends, and built visualizations with Matplotlib to surface actionable business insights. | |
| Student Management REST API <i>Python (Flask), SQLite</i> | Personal Project |
| • Built a REST API with Flask and SQLite to perform CRUD operations on student records, designing the endpoints, request handling, and database schema. | |

INTERNSHIP EXPERIENCE

- | | |
|--|---------------------------------|
| AI/ML Trainee Intern Technorizen Software Solutions | Aug 2026 – Present |
| • Gaining hands-on experience in machine learning workflows, including data preprocessing, model building, and evaluation, as part of a 6-month AI/ML traineeship. | |
| Full-Stack Developer Intern Amstech Group | May 2025 – Nov 2025 (~7 months) |
| • Developed Java-based full-stack web applications using Core Java, Servlets, JSP, JDBC, and MySQL; implemented CRUD operations and responsive UI components. | |
| Java Developer Intern Web Dev Technology | Apr 2024 – Jun 2024 (~3 months) |
| • Developed and debugged Java application modules, resolving 15+ runtime exceptions; applied OOP principles to build structured, maintainable code. | |

EDUCATION

B.Tech, Computer Science Engineering IPS Academy (IES), Indore	2022 – 2026
---	-------------

CERTIFICATIONS

- Oracle AI Foundations Associate
- Coursera — Introduction to Databases
- Coursera — Java Full Stack Development
